LUU AUNG

Electrical Project Engineer | PMP® Certified

Power Distribution • HV/MV Infrastructure • Project Delivery

chris.luuaung@gmail.com | LinkedIn | +66 955 048 108 | Bangkok, Thailand

PROFESSIONAL SUMMARY

PMP-certified Electrical Project Engineer with four years of experience delivering HV/MV electrical infrastructure projects. Experienced in 33/11kV power distribution, transformers, overhead lines, street lighting, site coordination, procurement, contractor management, testing, commissioning, and project handover. Skilled in AutoCAD, single-line diagrams, load calculations, technical documentation, project scheduling, risk management, quality assurance, and HSE compliance.

CERTIFICATIONS

Project Management Professional (PMP) — PMI — May 2026

Global Procurement and Sourcing — Rutgers, The State University of New Jersey — August 2025

Google Project Management — Google — July 2025

EDUCATION

Bachelor of Science, Electrical Engineering

Fairleigh Dickinson University, Teaneck, NJ — May 2021

GPA: 3.3 | Senior Design: Motion-Activated Lighting System for Energy Efficiency and Security

PROFESSIONAL EXPERIENCE

Sun Electrical Engineering & Construction Co., Ltd — Yangon, Myanmar

Project Engineer — June 2021– December 2025

- Managed assigned schedules, procurement coordination, contractor activities, and progress reporting across three concurrent electrical infrastructure projects; led a core team of five engineers and coordinated with more than 20 vendors and suppliers.
- Reported to the Project Manager and senior management while independently managing assigned technical and project-coordination scopes.
- Tracked project milestones and reported progress through weekly status updates, monitoring schedule adherence, resource allocation, and alignment with client requirements and technical specifications.
- Developed and maintained project risk registers, proactively identifying schedule and technical risks and implementing mitigation strategies that supported on-time delivery across all projects.
- Supported supplier negotiations, evaluated vendor proposals, and coordinated procurement of electrical equipment, materials, and construction services.

Power Supply Construction — Yangon–Nyaung Tone Highway Toll Gate — *2023*

- Delivered 33/11kV power supply infrastructure to 2 highway toll gate sites, overseeing procurement and installation of 2 × 1,000kVA distribution transformers and overhead line networks.
- Managed 3 months of continuous night-shift construction under live-traffic constraints, coordinating crew schedules, safety controls, and traffic management with zero incidents.
- Led inspection, testing, and commissioning activities, achieving energisation of both sites ahead of the highway opening deadline.

Citywide Street Lighting Installation — Yangon — *2023 – 2025*

- Managed citywide street lighting upgrades across 5 townships, planning and executing nighttime construction schedules to minimize public disruption.
- Coordinated 40+ contractors at peak capacity, implementing HSE protocols that maintained zero lost-time incidents throughout the entire project duration.

- Supervised installation of hundreds of lighting poles, underground and overhead cabling, grounding systems, and LED luminaires across multiple concurrent work fronts.

33kV Overhead Line Relocation — Thilawa Port Development *2024*

- Led tendering process for relocation of an 11 km triple-circuit 33kV overhead line supporting major road reconstruction for the Thilawa Special Economic Zone.
- Evaluated bids from 10+ contractors, conducting technical and commercial bid analysis to select qualified contractors for high-voltage construction works.
- Planned and executed multiple short-duration and half-day planned outages in coordination with utility operators, achieving zero unplanned service disruptions and delivering on schedule for road opening.

Technical Engineering & Documentation

- Produced technical documentation in AutoCAD including single-line diagrams, load calculations, substation layouts, and protection relay coordination drawings.
- Conducted site inspections and quality assurance checks to verify contractor workmanship compliance with design specifications, safety standards, and regulatory requirements.

Asia Power Quality Yangon, Myanmar

Electrical Engineering Intern March 2020 – March 2021

- Assisted senior engineers with electrical system inspections, project documentation, and administrative support for power quality assessment projects.

CORE COMPETENCIES

Technical Engineering: HV/MV/LV Power Systems (33kV / 11kV / 0.4kV) • Electrical Distribution • Distribution Transformers • Overhead Lines • Underground Cabling • Grounding and Earthing • Substation Layout Documentation • Single-Line Diagrams • Load Calculations • Protection-Relay Coordination Documentation • Testing, Commissioning and Energisation.

Project Management: Project Scheduling • Site Supervision • Contractor Management • Procurement and Tendering • Technical Documentation • Project Risk Management • Quality Assurance • HSE Compliance • Stakeholder Coordination • Progress Reporting • Project Handover

Soft Skills: Stakeholder Communication • Cross-Functional Team Leadership • Vendor Negotiation • Problem-Solving & Critical Thinking • Decision-Making • Multi-Cultural Adaptability • Time Management • Conflict Resolution • Technical Report Writing • Attention to Detail

Software & Tools: AutoCAD • Microsoft Excel • Microsoft Word • Microsoft PowerPoint
